Resolving All Your ICT needs

Company Profile

Warm & Hearty Greetings,

It is with great joy and a deep sense of commitment as I write this brief introduction. There is no doubt that ICT has come to stay; the world has indeed become a global village. Information and communication technology greatly affect the way we live our daily lives.

Hemingway Global Services limited was established from a burning desire to align the different sectors and businesses of our economy to the IT world.

It has become a known fact that the businesses that shall survive in the 21st century are those who are willing to adopt ICT.

The quest to provide high quality, cost effective software solutions is a major driving factor for us as a business, we have operated successfully in the versatile Nigerian market for about 3 years.

We are experts in the Enterprise Business-Process-Automation Software, RFID solutions, Enterprise-on-demand portal, payment system integration, Biometrics and Education software.

Please take a moment glance through to see just a glimpse of what Hemingway Global Services is all about.

For us "PERFECTION" is our watch word.

Best Regards,

Charles Ofoefule,

*[B.Eng. (First Class Honours), Enterprise Software Architect, OCPJP, MIEEE]
Executive Director, Hemingway Global Services Ltd.*

Who We Are

Hemingway Global Services Limited is an indigenous ICT company duly registered in CAC with RC #:1179124. The vision for the establishment of Hemingway Global Services is the desire and will to effectively address the constantly increasing ICT needs of many businesses and government organizations in Nigeria and Africa.

We strongly believe that small, medium and large scale organizations can attain a high level of success, if they adopt the right ICT tools.

Our software development and deployment process have been designed following industry best practices and world standards. Integrating the requirements of standard software development lifecycle is key to the success of a project and we do not take this for granted. We ensure that all the software project and deployment must pass through this lifecycle to ensure the success and sustainability of our projects.

With our expertise, we work closely with our clients to streamline business process and ensure that redundant steps are eliminated. This will create the enabling environment for the deployment of any software system that will finally automate a manual process.

INNOVATION

COMPUTER BASED ASSESSMENT SOLUTION

**YOUR RELIABLE, FLEXIBLE & ALL-IN-ONE COMPUTER
BASED ASSESSMENT SOLUTION**

One of the major requirements for schools and organization is the need to automatically, schedule assessment & exams, grade scores and ability to schedule exams at multiple locations at a single time. This needs cannot be solved with Pen-and-Paper based Testing (PPT).

Hemingway CBA[®] is the right tool to solve your needs it is an efficient way to provide a secure, consistent environment for Assessment and examination while significantly increasing the candidate's experience.

Primary and Secondary Schools

Tertiary Institutions

Military and Paramilitary

Government

Corporate Organizations

COMPUTER BASED ASSESSMENT (CBA[®]) VS PEN-AND-PAPER TESTING (PPT)

Advantages of CBA[®] over traditional Pen- and-Paper Testing (PPT)

- Increased Delivery, administration and grading efficiency
- Reduced costs from many elements of the testing life cycle
- Improved test security due to electronic transmission and encryption
- Unbiased test administration and grading
- Faster Decision making as the result of immediate grading and reporting
- Fewer response entry and recognition errors
- Faster and more controlled test revision process with shorter response time
- Increased examinee acceptance and satisfaction

RELIABILITY | FLEXIBILITY | SPEED | AUTOMATION | VALUE

Med-Station®

Integrated Hospital Management Information System

Developed and configured to adapt to the health care process in Nigeria, the Hemingway Med-Station® iHMS is a solution that meets the growing needs of hospitals and health care centers. The Med-Station® provides an end to end software solution for hospitals and medical centers: be it private or public, Med-Station® is Guaranteed to work.

Key BENEFITS

- Adaptability with Existing process & medical practice
- Customizable for Unique Requirement
- Flexible & Modular Design
- Ease of Use, Speed and Responsiveness
- NHIS claim Processing
- Inventory Management
- Integration to Accounting Solutions
- Role Based Access Control
- Biometric Integration
- Numerous Management Reports
- Information & Data Security

To promote ease of operations, search and verification of patients, the Hemingway Med-Station® is fully equipped with features aimed at making work easy.

Electronic Document Management System

Files & Documents are an integral part of any organization. The EDMS (Electronic Document Management System) is a complete end-to-end enterprise scale Document Management Solution which captures all facets of document management ranging from document workflows, document capture, and document archiving and custom meta-tagging. The design precept of our EDMS solution hovers around simplicity, flexibility & robustness.

YOUR ORGANIZATION CAN ATTAIN
A **99%** PAPERLESS Office Index

Core Features

- Automated & Distributed Document Classification & Extraction
- Flexible Document Workflows
- Multi Repository & Database support
- Document & File Tracking
- Document Archiving
- Document Version Control
- Audit Trail Support
- Information & Data Security
- Multiple Barcode Support & Recognition
- Flexible and Robust Document Conversion
- Multiple Device support
- E-Governance Platform
- Real-time Notification

KEY BENEFITS

- Increased User Adoption
- Paperless Office
- More Accurate Reports:
- Better Security
- Long term visibility
- Scalability
- Reduced TCO (Total Cost of Ownership)

SECURITY | SPEED | COLLABORATION | FLEXIBILITY

ENTERPRISE BILLING AND PAYMENT SYSTEM

A Very Secure and flexible Platform for

Billing, Payments, Fee-Workflow Process Automation, Reporting, Notification and User Collaboration

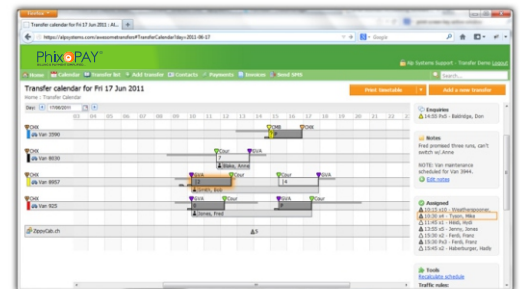

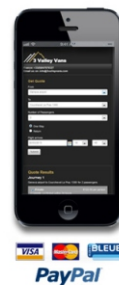

"The average Nigerian Tertiary Institution LOSES above 30 Million Naira annually owing to manual billing and payment, poor payment verification, zero or no reconciliation, fee evasion and payment fraud by students"

PhixPay[®] is a web-based enterprise billing and payment solution tailored and built with latest cutting-edge technologies; it provides a very secure and flexible platform for Billing, Payments, Fee-Workflow Process Automation, Reporting, Notification and User Collaboration.

With PhixPay[®], you can easily generate student bills, track fee payments, run reports, access dashboard and measure payment performance in real-time!

Key BENEFITS

- Elimination of Fees Evasion
- Increased Revenue from Fee Payments
- Real-time Payment Verification
- Better Payment Reconciliations
- Numerous Reports for Administrative Purposes
- Centralized and De facto Billing system for institution
- Accommodates Staff contributions & Welfare
- Online Donations Platform
- Low TCO (Total Cost of Ownership)
- No more hassles and queues making fee Payments
- Easy & Flexible to Use
- e-Receipts for payments
- Unique and Dedicated Bill record per student
- Easy Clearance Process
- Multiple Payment Channels

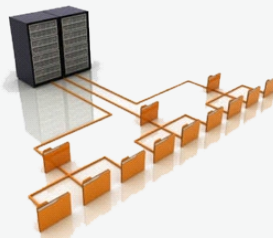

EASY | SECURE | CONVENIENT

Online Transcript Management System

Bridging the distance-gap and hassles of the manual method of Transcript Processing and Management.

with  **'ALL TRANSCRIPTS ARE JUST A CLICK AWAY'**

The Transcript Manager solution is an enterprise web application designed and built to completely automate and streamline all core processes involved in the computation, request, processing and delivery of Transcript request services in higher institutions (Universities, Polytechnics and Special institutes). With the Transcript Manager solution, Alumni can request their transcripts online; Exams & Records unit can keep close tabs on result and transcript computation indices across all faculties in their university.

Key **BENEFITS**

- Paperless Exams & Records Unit
- Increased ROI: Returns on Investment
- Improved Service Delivery to Alumni
- Flexible Payment Model
- Fraud Elimination on Academic Records
- Complete Transcript Process Automation
- Instant Feedback and KPI evaluation
- Improved Institutional Image (Local & International)

Core **FEATURES**

- Online Transcript Request
- Online Transcript Verification
- Real-time online payment and e-receipt
- Electronic Transcript Request Management
- Enterprise Reports and Real-time dashboard
- Alumni Collaboration & Social Networking
- Real-time Notification via Email & SMS
- Transcript Data Digitization
- Transcript Delivery Management & Real-time Tracking
- Online Helpdesk and Support
- 3rd Party Integration Capabilities

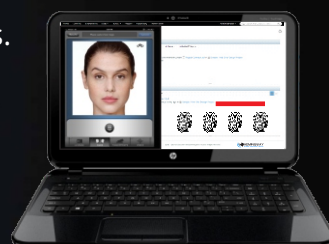

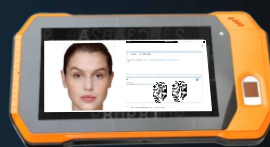

HydraBCS[®]

Biometric Capture System

HydraBCS[®] is a Biometric Capture System that can be used to capture the complete biometrics of an individual namely; fingerprint, face, Iris and signature. This product was developed to meet the growing need of biometric systems in the country in area of ghost worker elimination. This product can also be used to for biometric enrolment and capturing data that will be used for biometric card printing. Biometric data is captured in compliance to standards already set by the International Standard Organization (ISO).

The HydraBCS[®] can capture iris information with any of the widely available iris scanner. HydraBCS[®] can also be used to capture signature data. Though this data is not used for any form of biometric verification, it is very useful when signatures are to be reproduced on cards or any other document so required. It can be used with a great number of signature pads.

The biometric capture client is available in
**DESKTOP AND
MOBILE VERSIONS**

Key BENEFITS

- Flexibility, Security & Robustness
- User-defined Deployment Strategy
- Centralized & Distributed Data Storage
- Single Enrollment and Multiple Verification Design Model
- Enterprise Reports and Dashboards
- Adaptable for Biometric Time & Attendance (BTA), Ghost Worker Elimination, Nominal roll and KYC (Know Your Customer) projects
- 3rd party Integration Capabilities
- Unique Biometric ID and verification
- E-governance Framework
- Cost Savings and Increased ROI

Fixed and Mobile Asset Monitoring and Tracking System

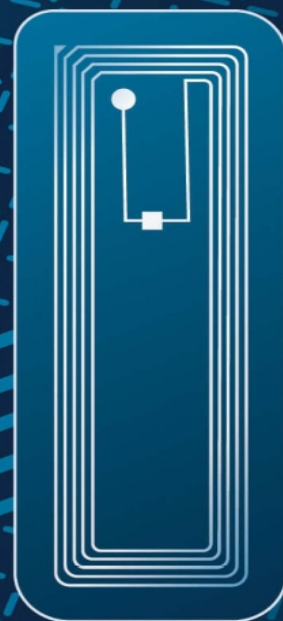

... designed to provide a centralized, state-of-the-art solution that consolidates and manages data of Fixed Assets, Locations, Users, Vendors, custodians and much more. It also provides real time tracking and monitoring capability. Numerous reports have been built in to aid audit process and management decision making.

Fixed and Mobile Asset Monitoring and Tracking System

Key BENEFITS

- Centralized Asset Records Database
- Better Inventory Control, Asset Tracking and Monitoring
- Easy to Use & Increased User Adoption
- Fast, Accurate and Efficient
- Little or No human intervention needed
- Reduction in Asset Theft and Unauthorized Asset Movement
- Reduction in Wastage and unnecessary Asset Acquisition
- Increased Asset-Item Level Visibility
- Better Accountability
- Improved Tracking Operation & Asset Management Services
- More Accurate Reports in Real time

GalaxyIMPOS®

Inventory Management and Point of Sales System

The Galaxy Inventory Management Solution is a state-of-the-art solution designed and built to cater for all inventory management processes in small, medium or large-scale organization.

The solution is extremely intuitive and easy to use. By Click of few buttons, users can gain insight to inventory reports, data and statistical analysis.

Most businesses run a rather herculean and manual process. Answers to critical business questions are hardly obtained in real time basis.

THE SOLUTION STRIVES TO PUT AN
END TO THE MANUAL PRACTICE OF
INVENTORY MANAGEMENT.

Key BENEFITS

- Flexible, Easy to Use and Robust
- Customer Relationship Management
- Electronic Inventory Record Keeping
- Automated Expiry Control
- Automated Stock Taking, Purchase Orders and Invoicing
- Role Based Access Control
- Numerous Inventory Management Reports
- Seamless Hardware Integration Support
- Barcode & POS integration Capability
- Security Audit Logs and Ease of Administration

EVMS[®] ENTERPRISE VISITORS MANAGEMENT AND TRACKING SYSTEM

... designed to manage and effectively track visitors movement inside an organization on real time basis. It also provides real time tracking and monitoring capability. The EVMS is the only system that is based on the intent of a person's access, controlling and monitoring movement through a series of secure access points in accordance with either a pre-defined or custom time-based trip plan. Alarms are generated when a person is detected as being in an incorrect location thereby ensuring the safety of unaccompanied personnel.

Key BENEFITS

- Centralized Visitors Records Database
- Better Visitors Tracking and Monitoring
- Easy to Use & Increased User Adoption
- Fast, Accurate and Efficient
- Returning visitors are recognized immediately
- Pre-registration
- More Accurate Reports in Real time

PhixBTA®

Biometric Time & Attendance & Access Control System

PhixBTA® solution is an on-demand Biometric Time and Attendance solution tailored to meet an organization's need with respect to tracking employee attendance. With PhixBTA® employer can save cost. For managers in charge of large groups the ability to know who is in attendance at any given point in time. Tracking of Time and Attendance becomes an easy task.

Key BENEFITS

- Flexible, Robust and Easy to Use
- Automated Time and Attendance Tracking
- Reduce Time & Attendance Fraud
- Numerous Reports for Administrative Purpose
- Low TCO and Increased ROI
- Cost Savings
- Professional Maintenance & Support Service

Core FEATURES

- Biometric & Basic Data Enrollment Module ➤
- Captured-Data & Employee Management Console ➤
- User Management: ➤
- Group management ➤
- Reports Module ➤
- Global Configuration and Settings ➤
- Access Control & Attendance Console ➤
- Biometric Device Management ➤

Custom built Enterprise Solutions (ERP, MIS, intranet portal etc)

One of our key strengths, lie in our ability to under-study organizational business process and implement a solution aimed at automating and streamlining that particular process. The best maintainers of any solution are the builders of that solution. Our on-demand software development and delivery methodology gives power to the client as we can always design, deploy, scale, update and manage solutions based on client's requirement.
